

```
include <stdio.h>
include <unistd.h>
include <string.h>

nt main(){
    int fd[2];
    char msg[] = "Hello";
    char buf[20];
    pipe(fd);
    if (fork() > 0){
        write(fd[1],msg,strlen(msg)+1);
    }else{
        read(fd[0],buf,sizeof(buf));
        printf("Received: %s\n",buf);
    }
    return 0;
}
```

To run a command as administrator (user "root"), use "sudo <command>".
See "man sudo_root" for details.

```
mo@mo:~$ cd ipc
mo@mo:~/ipc$ vi ipc.c
mo@mo:~/ipc$ nano ipc.c
mo@mo:~/ipc$ gcc ipc.c
mo@mo:~/ipc$ ls
a.out  ipc  ipc.c  ipc.c.save  ipc.save
mo@mo:~/ipc$ ./a.out
Received: Hello
mo@mo:~/ipc$
```
